

MySalutem Patient Portal

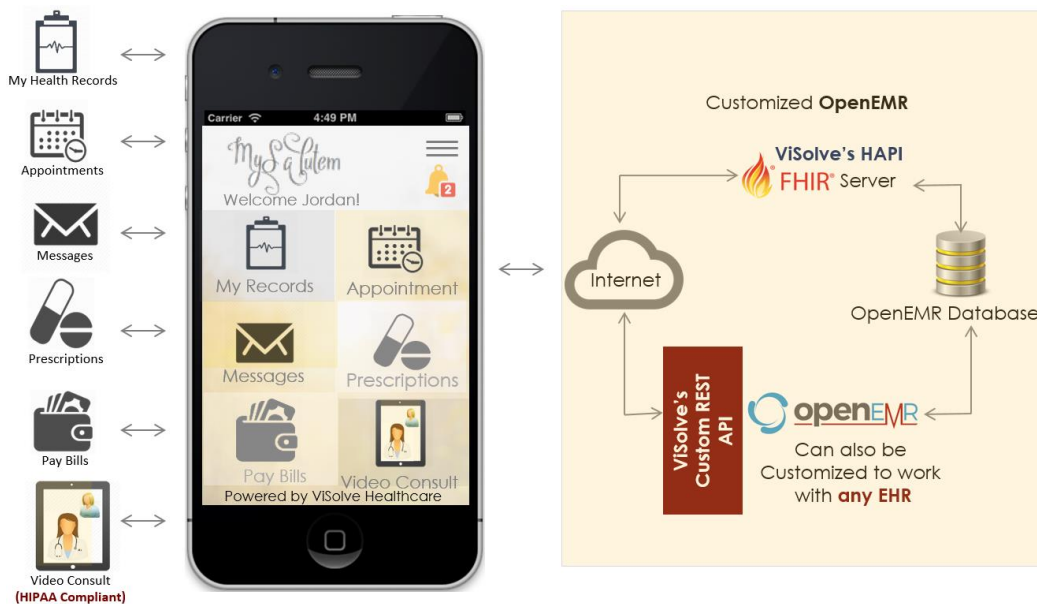

Patient Challenge

Simply blasting test results and appointment reminders to patients or asking them to fill out generic surveys that aren't related to their specific situation won't impact outcomes. Life is busy enough. To achieve better outcomes and improve patient satisfaction and loyalty, providers can leverage technology that will facilitate continuous engagement with patients utilizing personalized content.

What MySalutem can do for you?

In an effort to improve patient care, ViSolve offers its clients, an integrated and user-friendly State of art MySalutem which is an online Patient Portal. Since patient engagement is a vital element to preventative medicine, MySalutem is a valuable aspect to EHR solution. MySalutem provides patients with 24/7, secure access to their video visit, Appointment Request, lab results, medication history, ability to request prescription refill, billing information and much more! The easy to use MySalutem interface allows patients to interact with their doctor office when it's convenient for them, thereby reducing paperwork and unnecessary phone calls.
